WORK EXPERIENCE

Software Developer | Custom Communications, Raleigh, NC

NOVEMBER 2018 - PRESENT

- Individual contributor to Ruby on Rails software for the southeast's largest provider of IT installation and repair field services
- Refactored complex permissions architecture to scale for expansion of users and roles, in part using CanCan and Rolify gems
- Built background worker process to automate password updates for integrated web services
- Address incoming support tickets for client work orders, inventory management, and payment reconciliations

Back-End Instructor | Momentum Learning, Durham NC

DECEMBER 2017 - OCTOBER 2018

- Taught fundamentals of Ruby on Rails development to beginners
- Served as team lead for final project teams for program Demo Day
- Helped to manage a collaborative community of learners

Back-End Instructor | The Iron Yard, Durham NC

JUNE 2017 - NOVEMBER 2017

- Taught basics of Node.js and React development to beginners
- Mentored and provided team lead guidance and feedback to students

Web Developer | Adwerx, Durham NC

DECEMBER 2014 - JUNE 2017

- Developed front- and back-end features and tests in a legacy Rails SaaS application for online marketing
- Developed custom portals for enterprise partners, including SSO setup and support, data feed import and integration, and custom features
- Built digital ad images using JavaScript, Ruby, YAML, and ImageMagick
- Created integrations with Zillow and Google Image Search APIs
- Implemented AB tests in Ruby for product features
- Helped to establish and document engineering standards

ABOUT ME

I'm happiest when I'm solving challenging problems, learning new things, sharing what I know, and collaborating with genuinely nice humans.
