TECH EXPERIENCE

Web Development Instructor / The Iron Yard, Durham NC

JUNE 2017 - PRESENT

- Teach full stack web development fundamentals and tooling to coding beginners
- Mentor, live-code, pair program, and provide team lead guidance
- Web application development projects include HTML/CSS, client-side JavaScript, AJAX, Node and Express, Ruby on Rails, RESTful APIs, Postgres/Sequelize and MongoDB/Mongoose, React/Redux, Git/GitHub, and deployment with Heroku.

Full-stack Web Developer / Adwerx, Durham NC

DECEMBER 2014 - JUNE 2017

- Developed various front-end and back-end features in a Rails application for a company that provides online marketing for small businesses
- Developed web portals for enterprise partners, including UI, single sign-on setup and support, and data feed import and integration
- Refactored front-end templates and stylesheets to be responsive using Bootstrap 4, React, and BEM
- Built client-side and server-side ad images and API integrations with Zillow and Google Image Search
- Implemented AB tests in Ruby for product and site features
- Solicited team input and consensus in establishing and documenting engineering standards and practices, including standards for front end coding and architecture and data feed integration

Core Contributor / Girl Develop It — *www.girldevelopit.com*

AUGUST 2014 - PRESENT

- One of four developers on a complete rebuild of Girl Develop It national website
- Created and implemented a Vagrant/Linux development environment for project contributors
- Wrote documentation for setting up VM and Vagrant box locally

ABOUT ME

I'm a full stack developer with a keen interest in JavaScript and a commitment to inclusive tech communities and education.

I'm looking for a full-time position that challenges me to solve new problems, enables me to learn more things, and lets me collaborate with interesting, talented, and genuinely nice humans.
