TECH INDUSTRY EXPERIENCE

Full-stack Web Developer / Adwerx, Durham NC

DECEMBER 2014 - PRESENT

- Responsible for developing various front- and back-end features in a Rails 4 application for a startup that provides online marketing for small businesses
- Developed a responsive website using Bootstrap 4, React, and BEM
- Developed more than a dozen web portals for company partners, including UI, single sign-on setup and support, and data feed import and integration
- Solicited team input and consensus in establishing and writing new front-end coding standards
- Built client-side and server-side ad image layouts
- Built client-side and server-side API integrations with Zillow and Google Image Search
- Implemented AB tests for various product and site features
- Designed and built new product sign-up form functionality and flow
- Established and documented standards and practices for data feed content and structure, with separate documentation for internal use and external sharing

Core Contributor / Girl Develop It — *www.girldevelopit.com*

AUGUST 2014 - PRESENT

- One of four developers on complete redesign of Girl Develop It national website, begun as final project for Iron Yard Front End Engineering course and seen through to production in January 2015
- Website admin committee member
- Created and implemented a Vagrant/Ubuntu development environment for for project contributors
- Wrote documentation for setting up VM and Vagrant box locally

Instructor / Girl Develop It, Raleigh-Durham

JANUARY 2015 - PRESENT

- Taught JavaScript for Beginners course
- Developed curriculum for and taught Intro to Git & GitHub course

ABOUT ME

I'm a mid-level developer with full stack experience and a keen interest in JavaScript.

I'm looking for a full-time position that challenges me to solve new problems, enables me to learn more things, and lets me collaborate with interesting, talented, and genuinely nice humans.
